

Due to our growing interest in ecological and environmental issues, in the use of local and artisanal products and in the protection of these natural spaces, Hacienda El Santiscal has taken a series of measures over the last three years to help as much as possible. To this end, we have installed eco-water savers in the faucets and cisterns, dichroic and low-consumption light bulbs, heated towel racks to enable the re-use of towels, gel/shampoo and hand soap dispensers, solar panels, recycling of paper, cardboard, toners, batteries, and garbage selection, re-use of water to water the trees and plants internally, etc. We understand that all this is part of the quality and services that we provide to our guests and that give us an important added value.

For all these measures, for the ecological awareness that we maintain and for the support we provide for SUSTAINABLE TOURISM, Hacienda El Santiscal has obtained various Quality Marks and Ecological Seals, including CERES-ECOTUR, the international ECEAT and the already very prestigious "NATURAL PARK OF ANDALUSIA".we also managed very recently to be finalists in Rethink Hotel, a contest that rewards eco-conscious hotel establishments, and in 2016 we obtained the very well known ECOLIDERES Mark from Tripadvisor in its Gold category:
